PRESS RELEASE

KAWASAKI INTRODUCES KPO 4-STROKE RACING OIL, CREATING A NEW BENCHMARK FOR PERFORMANCE AND PROTECTION

Kawasaki Motors Corp., U.S.A. announces the launch of Kawasaki Performance Oil's (KPO) all-new triple-synthetic engine oil, a unique blend of three premium synthetic oils engineered for high-performance racing applications. The KPO Full Synthetic SAE 10W-40 4-Stroke Racing Oil was developed through Kawasaki's deep racing heritage and represents the pinnacle of performance protection, designed to deliver unwavering reliability from the starting gate to the checkered flag.

Blended from the finest synthetic base oils and advanced additive technology, KPO 4-Stroke Racing Oil is built to perform where the pressure's highest. The triple-synthetic formulation helps to minimize internal friction, keep engines running cleaner, and maintain peak horsepower under the most demanding conditions. This new formulation can lead to uncompromised power delivery, longer component life, and sustained engine efficiency across extreme temperatures and RPM ranges seen in racing environments.

By maintaining a stable lubricating film even at high temperatures, the formulation helps the clutch operate cooler and more efficiently, giving riders a confident, connected feel whether they're launching out of the gate, navigating technical sections, or powering through long motos. The oil's high shear stability keeps its viscosity from thinning under extreme load, allowing the clutch plates to engage more predictably and with smoother modulation. This means less slip when you hammer the throttle, more precise feedback at the lever, and a more consistent transfer of power through the entire RPM range. You can learn more about Kawasaki Performance Oils on the [Kawasaki website](https://www.kawasaki.com).

Initially available in 1-Quart Bottles through Kawasaki dealerships nationwide and online, 1-Gallon Bottles will follow this Winter, providing flexibility for racers, tuners, and performance enthusiasts alike. From pro-level race machines to weekend warriors, KPO 4-Stroke Racing Oil empowers riders to push further, faster, and with total confidence.

ABOUT KAWASAKI

Kawasaki started full-scale production of motorcycles over a half century ago. The first Kawasaki motorcycle engine was designed based on technical know-how garnered from the development and production of aircraft engines, and Kawasaki's entry into the motorcycle industry was driven by the company's constant effort to develop new technologies. Numerous new Kawasaki models introduced over the years have helped shape the market, and in the process have created enduring legends based on their unique engineering, power, design and riding pleasure. In the future, Kawasaki Motors, Ltd. is committed to maintaining and furthering these strengths which will surely give birth to new legends.

Kawasaki Motors Corp., U.S.A. markets and distributes Kawasaki motorcycles, ATVs, side x sides, and JET SKI® watercraft through a network of approximately 1,100 independent retailers, with close to an additional 7,700 retailers specializing in general purpose engines. Kawasaki and its affiliates employ nearly 3,100 people in the United States, with approximately 260 of them located at Kawasaki's Foothill Ranch, California headquarters.

Kawasaki's tagline, "Let the Good Times Roll.®", is recognized worldwide. The Kawasaki brand is synonymous with powerful, stylish and category-leading vehicles. Information about Kawasaki's complete line of powersports products and Kawasaki affiliates can be found on the Internet at www.kawasaki.com.
