# 2022 KAWASAKI KLX® OFF-ROAD MODEL RANGE GET OUT AND PLAY

The Kawasaki KLX® family of off-road motorcycles are widely popular with their easy-to-ride character, incredible capabilities while on trails and their low maintenance needs. The eight off-road models consist of four engine configurations and are built to suit a wide variety of riders.

The KLX®300R off-road motorcycle bridges the gap between a weekend play bike and a full race bike. As the flagship of the KLX® lineup, the KLX300R combines the best of both engine and chassis performance to create the ultimate lightweight, fun off-road machine. The powerful 292cc fuel-injected, liquid-cooled four-stroke engine features an electric starter and keyless ignition. It has a user-friendly smooth-shifting six-speed transmission and manual clutch. The KLX300R comes equipped with full-size off-road wheels and tires, using a 21" front and 18" rear, and long travel suspension for optimal ground clearance.

The KLX®230R off-road motorcycle is available in two model variations and has been purpose-built for serious fun in the dirt; with priority placed on both its engine and frame design. It was designed and built to be a lightweight and easily maneuverable motorcycle for a broad range of riders. A powerful 233cc fuel-injected, air-cooled four-stroke engine utilizes an electric starter and keyless ignition, and has been paired with a reliable, easy-to-use smooth-shifting six-speed transmission and manual clutch. The KLX230R comes equipped with full-size off-road wheels and tires, using a 21" front and 18" rear, and long travel suspension for optimal ground clearance. The shorter KLX®230R S off-road motorcycle is ideal for riders who prioritize a lower seat height and ample ground clearance while offering a full-size recreational trail bike option. The KLX230R S features modified front and rear suspension that lowers overall seat height by one inch from the KLX230R.

The KLX®140R motorcycle is available in three model variations and is designed to provide an off-road experience with memories to last a lifetime. The powerful 144cc, four-stroke, air-cooled, single-cylinder engine features an electric starter and keyless ignition. Its broad and smooth high-revving 144cc engine utilizes a manual clutch and five-speed transmission to offer an efficient and user-friendly feel. The KLX140R uses a 17" front and 14" rear wheel, while the mid-sized KLX®140R L motorcycle is equipped with a 19" front and 16" rear wheels to accommodate taller riders, providing extra ground clearance. The KLX®140R F comes equipped with full-size off-road wheels and tires, using a 21" front and 18" rear.

The KLX®110R is available in two model variations and is a great motorcycle for new riders looking to experience off-road for the first time. A high-tensile steel frame, 30mm telescopic fork, and single rear shock provide easy handling and maximum longevity. It also incorporates an automatic centrifugal clutch system that allows easy take off and shifting through the gears, helping the rider maintain focus on the terrain and to make the most of the 112cc single-cylinder, four-stroke engine. The larger KLX®110R L motorcycle has a taller seat height (28.7" compared to 26.8" for the KLX110R), longer suspension travel, an extra 1.9" of ground clearance and a four-speed transmission with a manual clutch. No matter your size or skill level, there is a KLX model motorcycle to allow you to get out and play with Kawasaki.
