The Kawasaki KLX® family of off-road motorcycles are widely popular for their low maintenance, easy-to-ride character, and incredible capabilities while on trails. The three models consist of two engine configurations and are built to suit a variety of riders.

The KLX®230R off-road motorcycle has been purpose-built for serious fun in the dirt; with priority placed on both its engine and frame design. It was designed and built to be a lightweight and easily maneuverable motorcycle for a broad range of riders. A powerful 233cc fuel-injected, air-cooled four-stroke engine utilizes an electric starter and keyless ignition, and has been paired with a reliable, easy-to-use smooth-shifting six-speed transmission and manual clutch. The KLX230R comes equipped with full-size off-road wheels and tires, using a 21" front and 18" rear, and long travel suspension for optimal ground clearance.

The KLX®140R motorcycle is available in two model variations and is designed to provide a natural terrain experience with memories to last a lifetime. The powerful 144cc, four-stroke, air-cooled, single-cylinder engine features an electric starter and keyless ignition. Its broad and smooth high-revving 144cc engine utilizes a manual clutch and five-speed transmission to offer an efficient and user-friendly feel. The KLX140R uses a 17" front and 14" rear wheel, while the mid-sized KLX®140R L motorcycle is equipped with a 19" front and 16" rear wheels to accommodate taller riders, providing extra ground clearance.
